Sir/Madam:

I am writing to formally express my intent to apply for a **Junior Full-Stack Developer** or related IT position within your organization. I am a graduating 4th-year Bachelor of Science in Information Technology student at **Bohol Island State University (BISU) - Balilihan Campus**.

I possess a strong foundation in **Software Development**, with hands-on experience building web and mobile applications using **Django, React.js, React Native, Firebase, and PostgreSQL**. Through my technical projects, including a comprehensive **financial tracking application** and a **real-time disaster coordination platform**, I have developed practical skills in engineering scalable backend architectures and developing internal tools using Python and React.

I am passionate about software development, problem-solving, and continuous learning. I am fast to learn new systems, detail-oriented, and highly adaptable. I am eager to contribute my technical skills to support your operations and ensure your systems run efficiently. Furthermore, while I am a current resident of Tagbilaran City, I am fully prepared to relocate, particularly to Cebu to join the right team.

Attached is my resume for your review. I am confident that my work ethic and technical background will make me a productive addition to your company. I welcome the opportunity to discuss how I can serve your organization in an interview.

Thank you for your time and consideration.

Respectfully Yours,

JOHN ROMEL D. LUCOT
